

Pre900

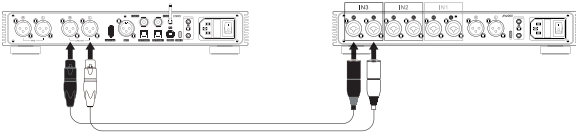

Quick Start Guide

1. Get to know your device

2. Connect to the input source

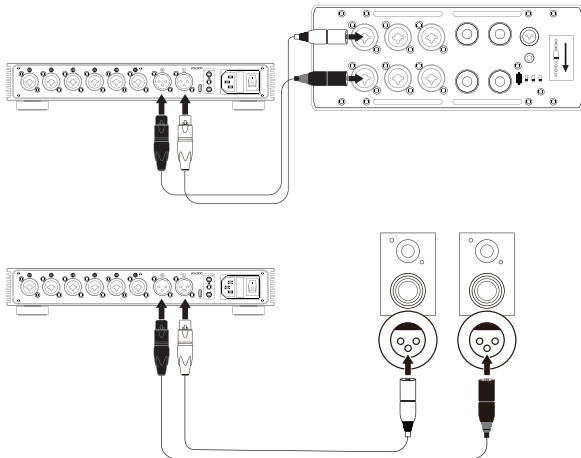

The Pre900 has three sets of inputs. You can use XLR or TRS balanced cables to connect any set to DAC.

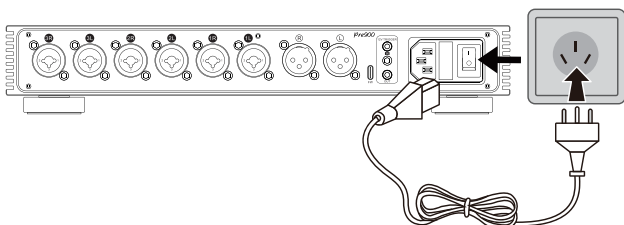

3. Connect the output device

Connect to amplifier or active speaker

Use XLR cables to connect to the amplifier or active speaker. In order to avoid damage to your devices, please turn off the amplifier or active speakers before you connect them to Pre900.

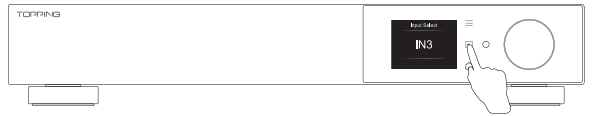

4. Connect the power supply and then turn on the device

5. Rotate the knob to select English and press the knob to confirm

6. Touch the [A] button to select the input you need to use

7. Turn down the volume

8. Play music and adjust the volume

If the maximum volume is still not loud enough, you can press the A button on the remote control to switch to a higher gain level.

Note: Please lower the volume before switching gain to avoid sudden loud sound.
